---

### SUMMARY

Self taught web developer with a background in history and graduate of NuCamp coding bootcamp. Initiated the development of over 20 projects from basic design to full websites. Primary languages of expertise include HTML, CSS, JavaScript, and React with strong critical thinking and problem solving skills.

### SKILLS

HTML	JavaScript	CSS3 – SASS
Git/GitHub	React	Bootstrap
Figma	Gulp	Code Review
Pair Programming	Critical Thinking	Problem Solving

### PROJECTS

#### [Random Quote Generator with API](#) 2022

*HTML, CSS, JavaScript, & API*

- Generates a short quote from a database every few seconds or when the new quote button is pressed.

#### [Wheel of Success](#) 2022

*HTML, CSS, & JavaScript*

- A phrase-guessing game that displays a randomly chosen phrase in hidden format and prompts the user to try to figure out the phrase using an onscreen keyboard.

#### [Simon Says Web Game](#) 2021

*HTML, CSS, & JavaScript*

- Selects a random pattern and adds to it continuously until the player makes a mistake, ending the game.

#### [Drum Kit](#) 2022

*HTML, CSS, & ReactJS*

- Allows user to play the drums using a set of keys marked with the letters of the associated chords. Pressing the corresponding key will play the connected sound file.

#### [Advice Generator](#) 2021

*HTML, CSS, JavaScript, & Figma*

- Generates a short piece of advice on page load and allows you, with a minor delay, to call up a random piece of advice manually afterwards.

#### [Pricing Component with Toggle Switch](#) 2022

*HTML & CSS*

- A pricing component that is set to annual prices by default and can be switched to monthly prices by toggling the switch between settings.
